

Pagan V is the newest and for now also the last installment in the Pagan series and it is soundset for Diva synth from U-he. It is a soundset with 100 patches categorised into ARP's, Bases, Bass Loops, Effects, Keys, Leads, Pads and Soundscapes. The sound of Pagan V is mysterious, dark and analogue and sometimes with that nice juicy analogue dissonance.

The soundset is crafted for composers and producers working in the film, tv, game, trailer and music library business.

And as a little extra you also get 10 bonus patches for Repro 5.
