

Journeys is a new soundset for Omnisphere 2 with an experimental character. It contains 128 patches created from the original Omnisphere 2 soundsources and they are divided into 2 categories.

1: Textures Playable – patches using the standard tuning system and with a sort of tonal foundation

2: Textures Soundscapes – patches using the many different tuning systems available in Omnisphere 2 that create experimental, rich, strange, mysterious and ominous soundscapes that leaves the feeling of tonality behind us.

Journeys is a soundset with a rich sound world featuring dystopian sounds, mystique surrealistic ambiances, cold harsh horror sounds and rich evolving futuristic and science-fiction like sounds. It draws its inspiration from Dante's Inferno from the Divine Comedy (the patches The First Ring till the Ninth Ring are directly inspired from this), till the book the Stand from Stephen King till the old Mad Max movies. Other sources of inspiration are the movies Contact and The Arrival and the great works of William Blake, Edgar Allan Poe and Salvador Dali.
